

# SPEEDWAYS FOR WORDS

## BY WESTERN UNION

HOW A TELEGRAM FLASHES FROM ORIGIN TO DESTINATION THROUGH WESTERN UNION'S ULTRA-MODERN HIGH-SPEED MESSAGE CENTERS.

It starts its swift trip from the sender's office by Telefax (top) or by Teleprinter (center) or from a Western Union office (bottom).

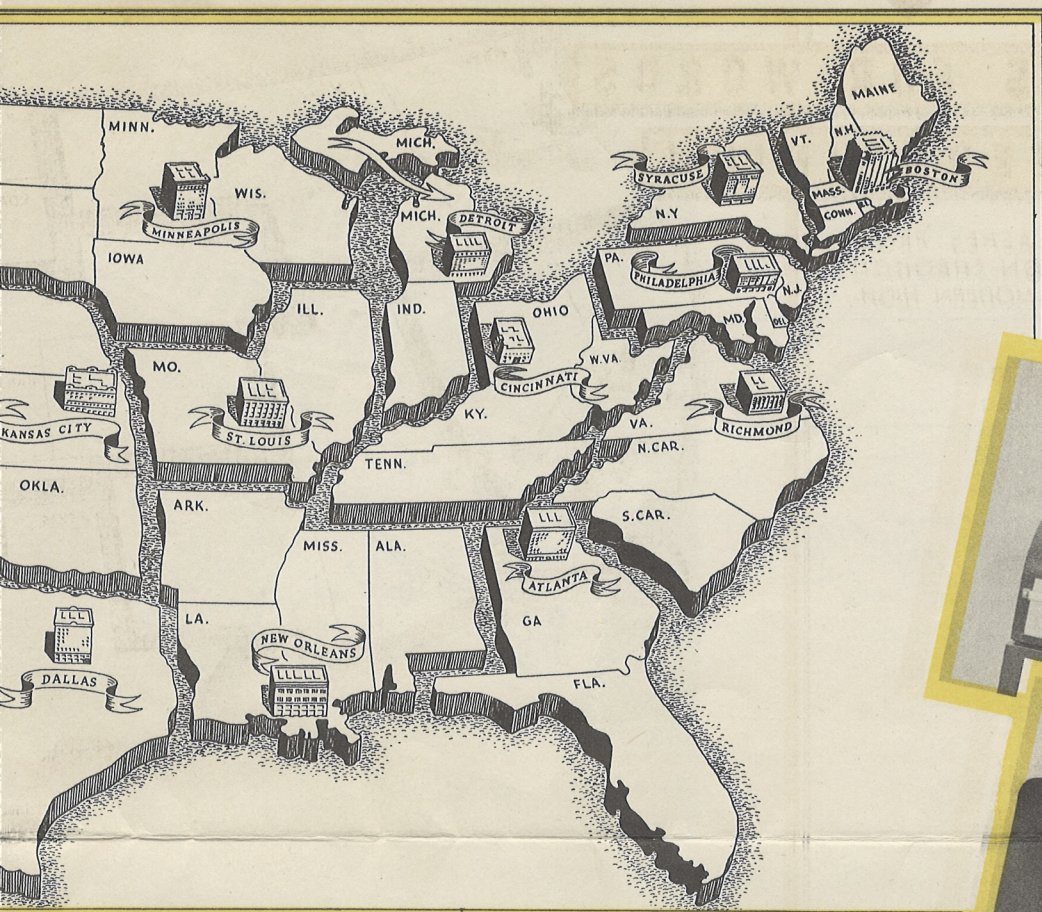

Western Union's nationwide network of message centers. The chart above indicates the national network of message centers.

At telegraph message center, electrical equipment automatically speeds the message to destination.

Centers brings new efficiency and economy to telegraph operation.  
 fifteen message centers and the area served by each.

At destination, the telegram arrives  
 in printed form ready for delivery.

At terminal, the telegram is transmitted automatically  
 to the office of delivery by the push of a button.
